

Epithalon Product Specification Sheet

This product specification sheet provides technical and quality information for Epithalon supplied for laboratory research applications.

Product Identification

Product Name: Epithalon

Alternative Name: Epitalon

Peptide Sequence: Ala-Glu-Asp-Gly (AEDG)

CAS Number: 307297-39-8

Molecular Formula: C₁₄H₂₂N₄O₉

Molecular Weight: 390.35 g/mol

Form: Lyophilized Powder

Grade: Research Grade

Product Specifications

Purity: Refer to the current product specification and batch-specific COA

Appearance: Lyophilized powder

Packaging: Sealed research vial

Storage: Store at 2–8°C, protect from light

Availability: Subject to current inventory and production status

Quality & Analytical Documentation

Epithalon product specifications should be reviewed together with the applicable batch-specific Certificate of Analysis (COA), Safety Data Sheet (SDS), and other analytical documentation.

Actual analytical results may vary by production batch. Refer to the applicable Certificate of Analysis for batch-specific purity, identity and analytical results.

Packaging

Epithalon is supplied in sealed research vials. Available pack sizes and packaging configurations may vary according to order quantity and production batch.

Storage & Handling

Store and handle Epithalon according to the conditions specified in the applicable product specification, Safety Data Sheet and Certificate of Analysis.

Related Product
