Fill Volume: 10 mL per vial

Packaging: Ampoule/vial packaging

Key Declared Ingredients: Riboflavin, Bromelain and Lecithin

Supply Type: Professional B2B procurement

Availability: On request

MOQ: Please contact Sunone for current minimum order requirements

OEM / ODM: Available upon request, subject to project requirements

Batch Documentation: Available where applicable

Storage and Handling

Store according to the storage conditions stated on the product packaging and applicable batch documentation. Protect the product from inappropriate temperature exposure, contamination, and direct light where required.

Always review the applicable Safety Data Sheet and product documentation before handling, storage, transport, or distribution.

Packaging and Supply

Lemon Bottle Ampoule Solution is available for professional sourcing and international B2B procurement.

Packaging configurations, order quantities, labeling requirements, OEM/ODM options, destination-country documentation, and current lead times can be confirmed with our sales team before ordering.

Documentation Available

Supporting documentation may include:

- Specification Sheet
- Safety Data Sheet (SDS)
- Certificate of Analysis (COA), where applicable
- Batch-related documentation, where applicable
- Commercial and export documentation based on destination requirements

B2B Procurement Information

Sunone supports international distributors, aesthetic-product suppliers, laboratories, research organizations, and qualified commercial buyers.

For current pricing and availability, please provide the required quantity, destination country, packaging requirements, and any documentation requirements when requesting a quotation.

Regulatory and Compliance Notice

Product classification, permitted applications, import requirements, distribution requirements, and market authorization vary by country or region.

Buyers are responsible for determining the applicable regulatory requirements in the destination market before purchasing, importing, distributing, handling, or using this product.

Information contained in this specification sheet is provided for professional product identification and procurement purposes and does not constitute medical advice.
