

BPC-157 10mg + GHK-Cu 50mg + TB-500 10mg Specification Sheet

BPC-157 10mg + GHK-Cu 50mg + TB-500 10mg Specification Sheet

Product Overview

BPC-157 10mg + GHK-Cu 50mg + TB-500 10mg is a multi-component research peptide formulation combining BPC-157, GHK-Cu, and TB-500 in a single research blend.

This specification sheet provides general product information, component details, quality documentation references, storage information, and research-use information for the BPC-157 + GHK-Cu + TB-500 research blend supplied by 52ym.

Product Information

Item	Specification
Product Name	BPC-157 + GHK-Cu + TB-500 Research Blend
BPC-157	10mg
GHK-Cu	50mg
TB-500	10mg
Total Strength	70mg
Product Type	Multi-Component Research Peptide Blend
Form	Lyophilized Powder
Application	Laboratory Research Use
Storage	Refer to product label and batch-specific documentation
Quality Documentation	Refer to batch-specific COA
Usage	Research purposes only

Component Information

BPC-157
Amount: 10mg
Component Type: Research Peptide

GHK-Cu
Amount: 50mg
Component Type: Copper Peptide

TB-500

Amount: 10mg

Component Type: Research Peptide

This product is a multi-component formulation. The complete blend should not be represented by a single CAS number, molecular formula, or molecular weight. Component identity and batch-specific analytical specifications should be verified against the applicable Certificate of Analysis (COA).

Quality Documentation

Available documentation may include:

- Product Specification Sheet
- Certificate of Analysis (COA)
- Analytical testing documentation
- Batch-specific quality information

Specifications and analytical results may vary by production batch. Refer to the applicable batch-specific documentation for current information.

Research Use Statement

BPC-157 10mg + GHK-Cu 50mg + TB-500 10mg supplied by 52ym is intended strictly for laboratory, analytical, and scientific research purposes.

This product is not intended for human consumption, clinical diagnosis, therapeutic use, or veterinary use.
