

VIP (Vasoactive Intestinal Peptide)

Specification Sheet

Product Overview

Vasoactive Intestinal Peptide (VIP) is a naturally occurring neuropeptide belonging to the secretin/glucagon peptide family. VIP is widely studied in biomedical research due to its role in cellular signaling pathways, immune regulation, and physiological processes.

This specification sheet provides general product information, quality documentation details, and research-use information for VIP peptide products supplied by 52ym.

Product Information

Item	Specification
Product Name	Vasoactive Intestinal Peptide (VIP)
Abbreviation	VIP
Product Type	Research Peptide
Application	Laboratory Research Use
Appearance	White to off-white powder
Storage Condition	Store according to product label instructions
Purity	Refer to product certificate documentation
Usage	Research purposes only

Technical Information

Product Name:

Vasoactive Intestinal Peptide

Synonym Names:

- VIP peptide
- Vasoactive Intestinal Polypeptide
- Intestinal Vasoactive Peptide

Research Area:

- Peptide research
 - Neuroscience research
 - Cell signaling studies
 - Molecular biology research
-

Quality Documentation

Available documentation may include:

- Product specification sheet
- Certificate of Analysis (COA)
- Analytical testing information
- Product documentation

For detailed technical documents, please contact our team.

Research Use Statement

VIP peptide products provided by 52ym are intended strictly for laboratory research and analytical purposes. They are not intended for human consumption, clinical diagnosis, or therapeutic use.
